2

The Good News: There is plenty of room for optimism

1. More people are starting to care.
2. There's more help for people who want to act but aren't sure how.
3. More really good ideas & solutions are appearing
4. We see how people power can change the projected outcomes.

We can cause the EPIDEMIC OF ACTION we need

3

4

Most of the “Alarmed” group are either active advocates or willing to become active

Majority of the Alarmed are already active in advocacy or are willing to become active

Now, how to further motivate the “Willing” & “Inactive”?

U.S. DEPARTMENT OF AGRICULTURE
NATIONAL CLIMATE ADAPTATION CENTER FOR CLIMATE CHANGE COMMUNICATION

5

More help for people who aren't sure what to do

Increase your knowledge:

Project Drawdown- free online course
Climate Solutions 101

Many other resources on the Drawdown website!

JUMP

Want daily support & motivation?

TAKE THE JUMP

TAKE THE JUMP BY TRYING SIX SHIFTS TO PROTECT OUR EARTH AND LIVE WITH JOY

Clear, constructive, impactful, doable. <https://takethejump.org/>

8

Please do not reuse slides without permission

Hello Sara

For the first 6 days of your JUMP we'll be sharing helpful info on each of the six shifts, including what each shift is, guidance to help you with trying it, and background on why it's important.

First though, remember 'it's enough just to try!' So even if you can't keep to this 100%, it's still hugely impactful to just try your best. There's no shaming at The JUMP. We're all on our own journey!

WHAT

WHAT THE SCIENCE SAYS: Keep electronic products for at least 7 years.

WHILE TAKING THE JUMP: Try keep the phone you have and avoid buying new electronics

HOW

Check yourself - next time you're thinking of getting a new phone or other item, pause to think whether you really need one. Can I fix it, borrow one, buy secondhand...?

END CLUTTER
Keep products for at least **seven years**

You are part of something important! www.takethejump.org

9

Want to take some action? **Try Climate Changemakers**

OWN YOUR POWER
1 HOUR OF ACTION.
EVERY WEEK.

We're making climate action a habit, building community, and scaling our impact.

CONNECTING climate-concerned people-power with simple, effective action.

28%
28% of Americans are waiting to be asked to take political action on climate.

We're connecting climate-concerned individuals with weekly opportunities to take accessible, productive political actions, with no prep required.

BUILD POWER TOGETHER

We are:

- + Taking political action in the name of climate action.
- + Committed to justice, equity, diversity, and inclusivity.
- + Not partisan. Following the science to the no-brainer choices.
- + Championing a just, healthy democracy.
- + Working strategically.
- + Powered by volunteers and community.

10

More really good ideas & solutions

#1 Electrify Everything!

Burning fossil fuels to generate electricity & run vehicles is VERY inefficient

Most of the energy in the fuel lost as heat!

- Electricity generation w/ coal or natural gas: **~40% efficient**
<http://www.eia.gov/todayinenergy/detail.php?id=44336>
- Powering vehicles with gasoline: **12-30% efficient**
<https://www.fueleconomy.gov/feg/atv.shtml>

All-electric saves \$\$\$\$, because no more conversion

- EV/mile: 3-4c vs 14-20c for a gas vehicle
<https://avt.inl.gov/sites/default/files/pdf/fsew/costs.pdf>

60% of the energy from the coal or gas is wasted as heat-- only 40% becomes electricity.

70-80% of the energy gasoline lost as heat.

<30% left to move the car

11

Electrify Everything!

Even better when we can power our cars, buildings & factories with clean renewable electricity from wind & solar

- America's energy needs will be cut in half!!
Saul Griffith, Electrify
- **Bonus:** cleaner air, cleaner water, better health!

Lots more information at www.rewiringAmerica.org

No conversion loss!! Super efficient!

12

Electrify Everything!

Even better when we can power our cars, buildings & factories with electricity from wind & solar

- **Bonus:** no need for oil, gas from Saudi Arabia, Iraq, Iran, Russia....

"Heat pumps for peace & freedom"
Bill McKibben, 2022

Use American manufacturing and labor to build and install heat pumps in Europe to free them from need for Russian oil & gas.
- manufacturing contracts!
- job training!

D. Schroeder, NREL
No conversion loss!! Super efficient!

13

People Power & Social Tipping Points: Faster than you think

Our perception: Everything is moving at a linear (constant) pace

The reality: Many processes are exponential (multiplicative), not linear

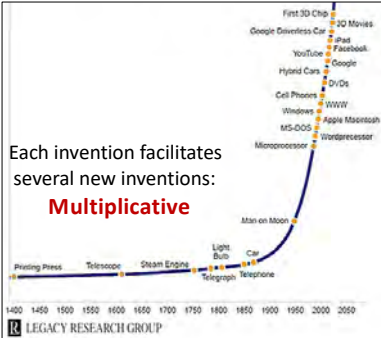

14

Examples: Adoption of new technology

Exponential Growth in Technology

Each invention facilitates several new inventions:
Multiplicative

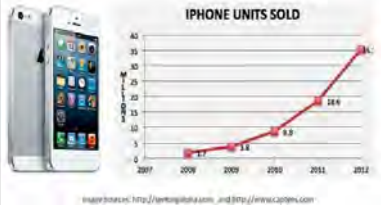

1400 1450 1500 1550 1600 1650 1700 1750 1800 1850 1900 1950 2000 2050

LEGACY RESEARCH GROUP

Smart Phone Uptake and Sales

At first only a few people had smart phones, then within only a few years, it seems that everybody has an iPhone or similar.
Eg. The Growth in Smart Phone usage has been Exponential.

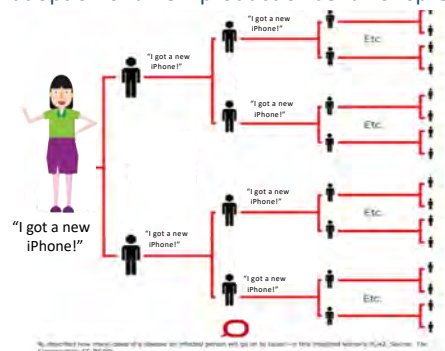

Behaviors can also be multiplicative

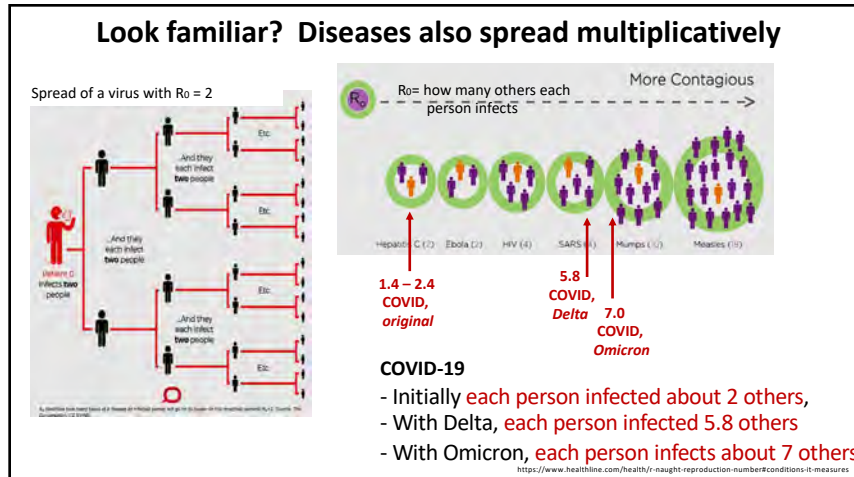

15

Multiplicative processes are surprisingly fast!

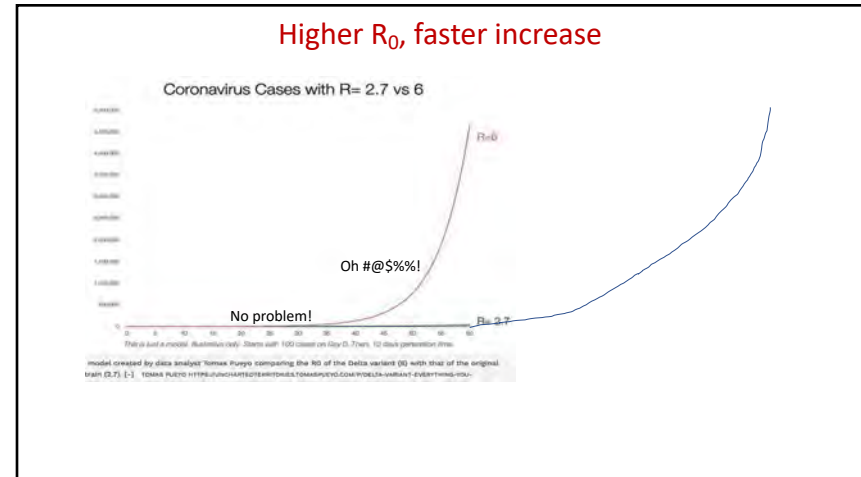

How adoption of a new product or behavior spreads

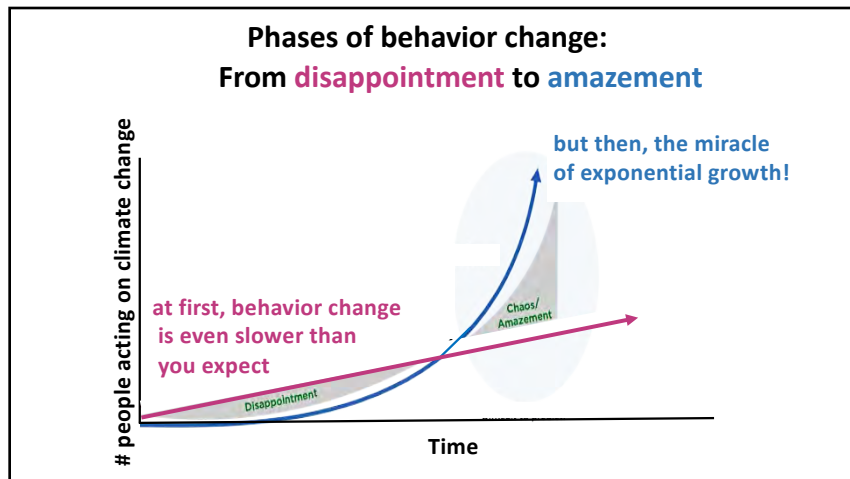

16

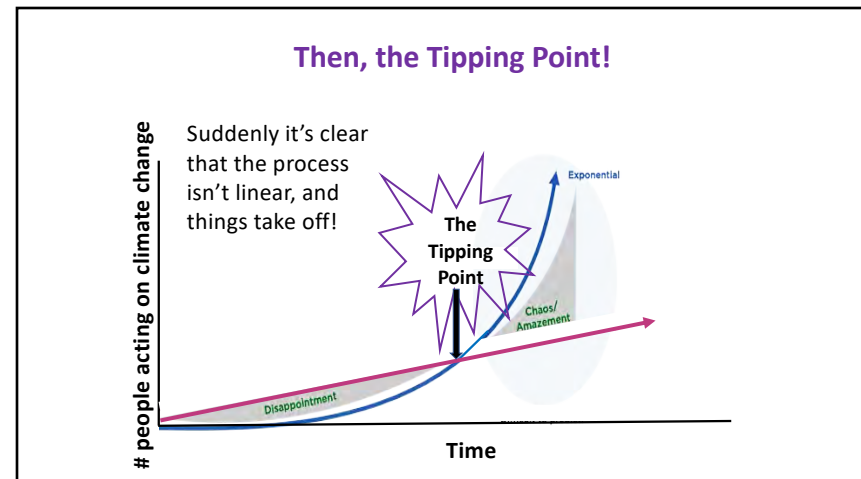

17

18

19

20

The Tipping Point

“The world of the Tipping Point is a place where the unexpected becomes expected, where radical change is more than a possibility. It is ... a certainty...”

...what can we do to deliberately start and control positive change of our own?...”

Malcolm Gladwell, 2000

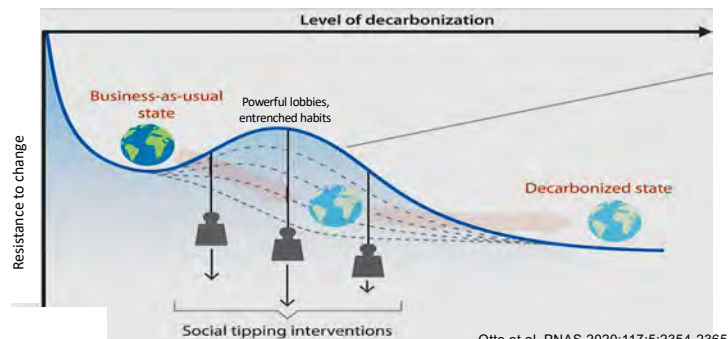

21

What Affects The Tipping Point?

- **The law of the few** (some people have huge R_0)
 - people with large social networks, extra knowledge, persuasive manner
- **The stickiness of the message** (getting people to notice and remember)
 - Rosie the Riveter, Victory Gardens, “We Can Do It!”
- **The power of context** (behavior depends on the environment)
 - As climate worsens, more people become alarmed
 - Social norms can change

22

An epidemic of climate action will counteract entrenched resistance to change

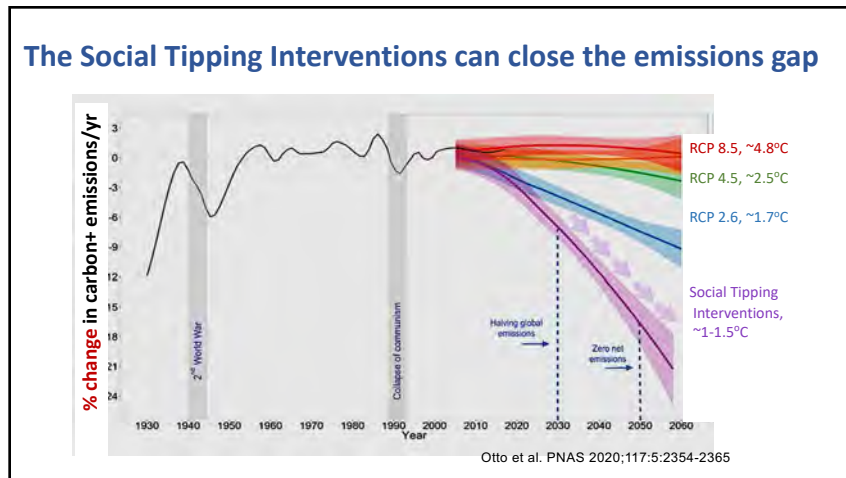

23

What are “Social Tipping Interventions”?

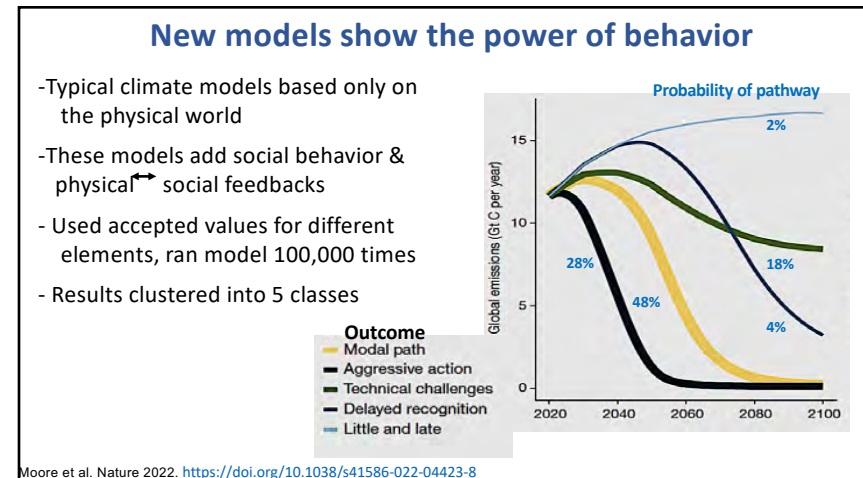

- six classes
- they interact
- two are key for activating people-power

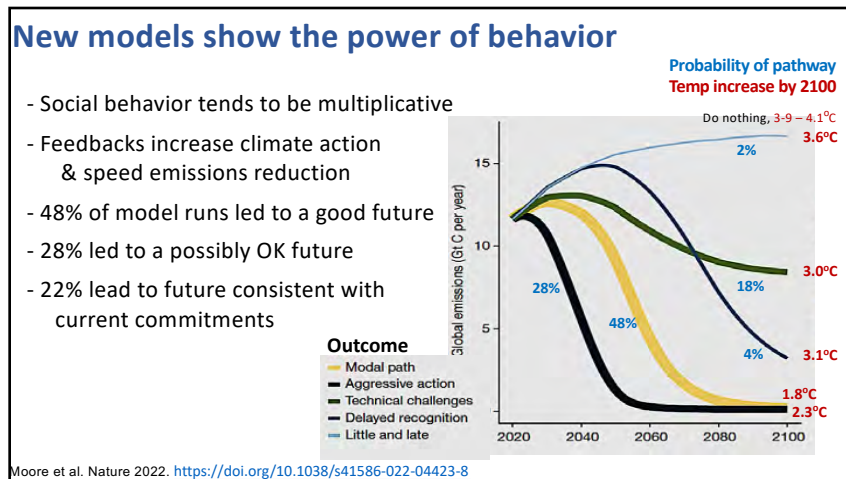

24

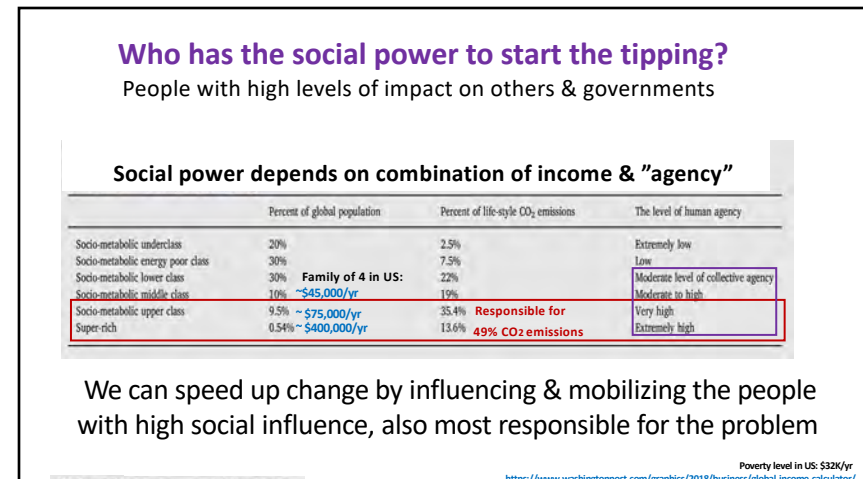

25

26

27

28

Social influencers show up and make a difference

29

What's your climate action R_0 ?

How many people can you "infect" with the motivation for action?

30

TO CHANGE EVERYTHING, WE NEED ... YOU!

Modified from The People's Climate March
